OBJECTIVE

Motivated MCA graduate with hands-on experience in Python, AWS cloud services, and full-stack development. Skilled in designing secure, scalable applications using Django, Spring Boot, and React.js, with proven project success. Adept at leveraging data science tools such as Matplotlib, Numpy, and Seaborn for analytical solutions. Seeking to contribute technical expertise and problem-solving skills to innovative software development and cloud-based projects.

EXPERIENCE (Internships)

Scopetech Software Solution - *Amazon Web services* **Madurai, Tamil Nadu** Jan 2026 – May 2026
Srishti Innovative Educational Services Pvt. Ltd. - *Data Science* **Thiruvananthapuram, Kerala** May 2025 – June 2025

EDUCATION

Bharathiar University **Coimbatore, Tamil Nadu**
Master of Computer Applications (MCA) **CGPA:** 7.5 July 2024 –April 2026
Nesamony Memorial Christian College **Kanyakumari, Tamil Nadu**
B.Sc Computer Science **CGPA:** 6.8 July 2021 – April 2024

PROJECTS

Exam Hall Management and Seat Allocation -Using 'Python', 'Django', 'HTML', 'CSS', 'JS', 'Bootstrap' and 'SQLite'

- Developed a full-stack Django web application for automated exam hall management and seat allocation, incorporating constraint-based algorithms to ensure integrity and accuracy.
- Implemented role-based dashboards and optimized performance, enabling bulk data upload, seating allocation, invigilation assignment, digital attendance tracking, and efficient handling of thousands of student records with reduced manual errors.

Secure Online Voting System – Using 'Java', 'Spring Boot', 'MySQL', 'OpenCV', 'HTML', 'CSS', 'JavaScript', and 'Blockchain'

- Built a secure online voting platform with multi-factor authentication (OTP), voter registration, candidate management, vote casting, result generation, and administrative modules, all designed with a user-friendly interface.
- Integrated blockchain and robust backend services using Spring Boot and MySQL to ensure tamper-proof voting records, secure authentication, transparent election management, and efficient data processing.

Hospital Management System – Using 'React.js', 'Node.js', 'Express.js', 'MongoDB', 'Socket.IO', and 'JWT'

- Developed a full-stack Hospital Management System with role-based access for patients, doctors, nurses, and administrators, including secure authentication and authorization using JWT and Bcrypt to protect medical records and hospital services.
- Implemented key healthcare modules and integrations such as appointment scheduling, medical report management, patient monitoring, and real-time messaging, supported by MongoDB, RESTful APIs, file upload functionality, and Socket.IO for efficient data management and communication.

ACHIEVEMENT

Bharathiar University **Coimbatore, Tamil Nadu**
MCA -**1st Rank Score in Mini Project** Nov 2025

TECHNICAL SKILLS

Primary Skills: Python, Java, AWS, Spring Boot, Matplotlib, Numpy, OpenCV, JS, SQL, HTML, CSS, SDLC, Django, Git and GitHub, Debugging, Documentation, Team Collaboration, Quick Learner.
Knowledge In: C, C++, Android, PHP

CERTIFICATES

Introduction to Internet of Things **view**
Python **view view**
AWS - Cloud Application Developer **view**
Foundation in Coding and Cloud Program **view**
